Research and Scholarship

Focus

The focus of my research is to analyze issues which may be useful to my students and the community at large (academics and practitioners).

Impact

The focus of my research in the past 30 years or so has been to understand contemporary issues relating to education, international and development issues, entrepreneurship, etc. My research has been presented in international conferences and reputable peer-review journals. I believe that my research has led to better teaching, further research by fellow academics (as evidenced by citations of my journal articles), and better policies based on my analysis of various issues.
